The performance presented represents past performance and is not a guarantee of future results. Investment return and principal value will vary so that, when redeemed, an investor's shares may be worth more or less than their original cost. Returns of less than one year are not annualized. NAV prices are used to calculate market price performance prior to the date when the Fund first traded on NASDAQ. Market performance is determined using the bid/ask midpoint at 4:00 pm Eastern time, when the NAV is typically calculated. Market performance does not represent the returns you would receive if you traded shares at other times. For the Fund's current performance, please call 800 279 0279 or visit www.davisetfs.com. The total annual operating expense ratio may vary in future years. Current performance may be higher or lower than the performance quoted.

* December 31, 2017.

** The Adviser has contractually agreed to waive fees and/or reimburse the Fund's expenses to the extent necessary to cap total annual fund operating expenses as shown until March 1, 2019. After that date, there is no assurance that the Adviser will continue to cap expenses. Prior to the cap the gross expense ratio was 0.86%. The expense cap cannot be terminated prior to that date, without the consent of the Board of Trustees.

This report is authorized for use by existing shareholders. A current Davis Select Worldwide ETF prospectus must accompany or precede this material if it is distributed to prospective shareholders. You should carefully consider the Fund's investment objective, risks, charges, and expenses before investing. Read the prospectus carefully before you invest or send money.

Shares of DWLD are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. There can be no guarantee that an active trading market for ETF shares will develop or be maintained, or that their listing will continue or remain unchanged. Buying or selling ETF shares on an exchange may require the payment of brokerage commissions and frequent trading may incur brokerage costs that detract significantly from investment returns.

As investors buy and sell ETF shares through a brokerage account or an investment adviser like ordinary stocks, brokerage commissions and/or transactions costs or service fees may apply. Please consult your broker or financial adviser for their fee schedule.

Objective and Risks. Davis Select Worldwide ETF's investment objective is long-term growth of capital. There can be no assurance that the Fund will achieve its objective. Some important risks of an investment in the Fund are: authorized participant concentration risk: to the extent that Authorized Participants exit the business or are unable or unwilling to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund shares may trade at a discount to NAV and could face delisting. common stock risk; depositary receipts risk: depositary receipts involve higher expenses and may trade at a discount (or premium) to the underlying security; emerging market risk: securities of issuers in emerging and developing markets may present risks not found in more mature markets; exchange-traded fund risk: the Fund is subject to the risks of owning the underlying securities as well as the risks of owning an exchange-traded fund generally; fees and expenses risk; foreign country risk; foreign currency risk; headline risk; intraday indicative value risk: the Fund's INAV agent intends to disseminate the approximate per share value of the Fund's published basket of portfolio securities every 15 seconds. The IIV should not be viewed as a "real-time" update of the NAV per share of the Fund because the IIV may not be calculated in the same manner as the NAV, the calculation of NAV may be subject to fair valuation at different prices, the IIV does not take into account Fund expenses, and the IIV calculations are based on local market prices and may not reflect events that occur subsequent to the local market's close; large-capitalization companies risk; manager risk; market trading risk: includes the possibility of an inactive market for Fund shares, losses from trading in secondary markets, periods of high volatility, and disruptions in the creation/redemption process. ONE OR MORE OF THESE FACTORS, AMONG OTHERS, COULD LEAD TO THE FUND'S SHARES TRADING AT A PREMIUM OR DISCOUNT TO NAV; mid- and small-capitalization companies risk; and stock market risk. See the prospectus for a complete description of the principal risks.

The information provided in this material should not be considered a recommendation to buy, sell or hold any particular security. Davis Fundamental ETF Trust has adopted a Portfolio Holdings Disclosure policy that governs the release of non-public portfolio holding information. This policy is described in the prospectus. Holding percentages are subject to change. Visit davisfunds.com or call 800 279 0279 for the most current public portfolio holdings information.

Forward Price/Earnings (Forward P/E) Ratio is a measure of the price-to-earnings ratio using the current market price and forecasted earnings for the calculation. Price/Book (P/B) Ratio is the weighted average of the P/B ratios of the stocks in a portfolio. The P/B ratio of a stock is calculated by dividing the current price of the stock by the company's per share book value. Stocks with negative book values are excluded for this calculation. Active Share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. EPS (Earnings Per Share) is the portion of a company's profit allocated to each outstanding share of common stock. Earnings per share serves as an indicator of a company's profitability.

We gather our index data from a combination of reputable sources, including, but not limited to, Thomson Financial, Lipper and index websites.

The MSCI ACWI® (All Country World Index) is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets throughout the world. The Index includes reinvestment of dividends, net foreign withholding taxes. Investments cannot be made directly in an index.

After April 31, 2018, this material must be accompanied by a supplement containing performance data for the most recent quarter end.
