

# ETFs: Selective. Attractive Growth. Undervalued.

“What gives us confidence that our ETFs will build wealth for our shareholders in the years and decades to come? The compelling attributes of our businesses.

By being highly selective and rejecting the vast majority of companies in the index, we’ve built portfolios in which the gap between price and value is among the widest we have ever seen. We believe this sets the stage for attractive returns in the years ahead.”

**Objective and Risks.** The investment objective of DUSA is long-term capital growth and capital preservation. The investment objective of DFNL, DWLD, and DINT is long-term growth of capital. There can be no assurance that the Fund will achieve its objective. Some important risks of an investment in the Funds are: **authorized participant concentration risk:** to the extent that Authorized Participants exit the business or are unable or unwilling to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund shares may trade at a discount to NAV and could face delisting; **China risk -**

**generally (DWLD & DINT); common stock risk; credit risk (DFNL):** The issuer of a fixed income security (potentially even the U.S. Government) may be unable to make timely payments of interest and principal; **cybersecurity risk; depositary receipts risk:** depositary receipts involve higher expenses and may trade at a discount (or premium) to the underlying security and may be less liquid than the underlying securities listed on an exchange; **emerging market risk (DFNL, DWLD, & DINT); exchange-traded fund risk:** the Fund is subject to the risks of owning the underlying securities as well as the risks of owning an exchange-traded fund generally; **exposure to industry or sector risk (DWLD & DINT):** significant exposure to a particular industry or sector may cause the Fund to be more impacted by risks relating to and developments affecting the industry or sector; **fees and expenses risk; financial services risk (DUSA & DFNL); focused portfolio risk (DUSA & DFNL); foreign country risk; foreign currency risk; foreign market risk (DWLD & DINT); headline risk; interest rate sensitivity risk (DFNL):** interest rates may have a powerful influence on the earnings of financial institutions; **large-capitalization companies risk; manager risk; market trading risk:** includes the possibility of an inactive market for Fund shares, losses from trading in secondary markets, periods of high volatility, and disruptions in the creation/redemption process. **ONE OR MORE OF THESE FACTORS, AMONG OTHERS, COULD LEAD TO THE FUND'S SHARES TRADING AT A PREMIUM OR DISCOUNT TO NAV; mid- and small-capitalization companies risk; shareholder concentration risk;**

and stock market risk. See the prospectus for a complete description of the principal risks.

The S&P 500 Index is an unmanaged index of 500 selected common stocks, most of which are listed on the New York Stock Exchange.
